I am a motivated software engineer, searching for a full-time, entry-level software development role. I am currently employed by School of Code in an internship position as a full stack developer. I am a School of Code alumni which is a full stack Javascript development bootcamp; My final project stack was postgres, express, react and node. We also used jest and cypress for testing. I have completed the Code First Girls Python and Apps course with BAE systems..

EXPERIENCE

School of Code Internship

October 2022 - Current

A three month paid internship to develop an inhouse full stack software solution as per product outline. Working in an agile team to produce commercial software to specification.

School of Code Bootcamp

November 2021 - March 2022

A full-time sixteen week Javascript-stack development bootcamp.

My final project "Jelly" is a PERN stack app. Is a maths and financial literacy web based app. Containing a jelly sprite, a jelly shop and bean-o-meter and jingles. In an agile team of six people, I pair programmed and worked on the shop, the quiz questions and the database.

<https://jelly.netlify.app>

Code First Girls

BAE systems Python and Apps course. Using python, modules and API's to build an interactive game.
